

## Ardormie Farm Cottage

### EV Charging

(Electric Vehicles)

#### **NB Charging of Electric Vehicles is NOT permitted at Ardormie Farm Cottage**

We do not currently have facilities to allow guests to charge EVs. There are several reasons for this:

- Insufficient electrical capacity from the transformer which supplies the farm
- No proper charging point with in built safety features
- No 13-amp sockets rated for EV charging
- No connection with a dedicated RCD-DD device which would disconnect the live, neutral and earth conductors from the vehicle in the event of a fault
- EV charging is out with the scope of our insurance cover

Current advice is that without the appropriate safety protocols being in place the body of the car could become live at any point, a normal 13A socket could catch fire, especially if that socket is close to a window and is in proximity to soft furnishings or curtains.

EV charging points are available in Alyth, Blairgowrie, Coupar Angus and Kirriemuir
